I am a full-stack developer and work primarily with C sharp and JavaScript languages. I consider myself a limitless learner and love learning new technologies and tools that make me a better developer. I am so excited about front-end and full stack development, game development and Web3 tech stack focused Engineering. I am currently looking for a *Full-Stack developer* role to enhance my skills and experiences in a hybrid or remote role in UK.

## Note!

Because of my Visa status, I would consider the roles outside of the IR35 only.

## Key Skills

C sharp, JavaScript, Angular, React JS HTML5, CSS3, SQL, Python, Nodejs, Solidity

## Skills

- **Front-end development:** HTML5, CSS3, JavaScript (jQuery, ReactJS, Angular JS)
- **Back-end development:** .NET Core Framework, NodeJS, Python and Solidity
- **Rest API:** Express JS, Micro Services, POSTMAN
- **Web 3:** Solidity, NFT
